MINING, BUSINESS AND STOCKS

M'KINLEY COMPANY TO MAKE CHANGES

Will Increase Capitalization to a Million Shares of Stock.

VICTOR MAKES A SHIPMENT.

Plutus Nearly Carload of Ore Ready To Ship, That Will Pay Operating Expenses.

(Special to the "News.") Eureka, March 22.—In these days o progress and prosperity in the mining ndustry companies with less than 1,600,000 shares appear to be looked disfavorably on, particularly in the Tintic district, and the companies which save been organized for some time are gradually falling into line and incasing their capitalization. The Mc-Kinley she choiders will hold their annual meeting on the 19th of next month, and among other things to be considered at that meeting will be the oposition of increasing the capital ock to 1,000,000 shares, which will an that something like 600,000 shares will go into the treasury, thus provid-ing a working fund and doing away with assessments for some time to come. It is understood that the larger chareholders in the corporation javor chareholders in the corporation favor this plan. Under the management of Henry Matsch the McKinley is now doing some important development work when promises to give a good account of itself in the near future. The victor made a shipment of good ore the latter part of last week, which with the product of the leasers now operating in the mine. The ore was taken from the 300 level, and the bins at the mine comtain enough ore for another shipment. Some development work is being done on the 800 in clin the Victor, which promises to have an important hearing upon the future of the property. It is understood that the company will put a much larger force to work next month.

SWANSEA TO BE SHIPPER.

SWANSEA TO BE SHIPPER.

SWANSEA TO BE SHIPPER.

The Swansea at Silver City is being worked at a depth of 800 feet, the first time in many years. There is a nice showing of ore on the 700 foot level, in virgin ground, both north and south of the shaft, and the Swansea will be a regular shipper in the future. The Opex at Mammoth has reached a depth of 2,000 feet and after, cutting a station on this level the shaft will be deepened to the 2,500 mark before drifts are started out in search of the ore.

The new holsting plant at the Tinthe Development company is being in-stalled by F. B. Sullivan, formerly master mechanic at the Gemini mine. The Wicklow company has raised its capitalization from 500,000 shares to 1,000,000 and as a result the company now has about 330,000 shares in the treasury for a working fund.

The people who had an option on the Meilich group of claims in East Tintic have transferred the option to the American Security and Redemption company, and it is understood that work is to be started at once.

PLATRUS HAS SHIPMENT

PLUTUS HAS SHIPMENT.

John Strang, superintendent at the Phutus, states that he has nearly a carload of silver-lead ore at the mine awaiting shipment. This ore has been taken from the old workings, and will run from 30 to 40 per cent lead and 20 ounces silver to the ton. The ore which is now being taken out will be more than sufficient to pay the operating expenses of the mine. It is understood that the Plutus will be operated on a much larger scale after.

South Columbus Con ... South Columbus Con ... South Columbus Con ... operated on a much larger scale after Manager Evans has looked over the

Manager Evans has looked over the property.

Manager A. N. Holdaway of the Tintic Central, who was in camp for a few days this week, stated that the new hoist for his company would arrive within a couple of weeks and that it would be installed immediately after its arrival. The hoist will be oberated by electricity, a contract having already been made with the Tellarido Power company for the power. The porphry through which the Tintic Central, shaft is being sunk is so soft that machine drills are hardly a necessity in the mine at the present tings and Mr. Holdaway says that a compressor will not be purchased until the lime formation is encountered.

The third connection with the ore made up in the Iron Blassom allows the company to increase its daily tonnage to close on to 200 tons daily without any difficulty. The output of the mine is now about 190 tons daily.

STOCKS ARE FAIRLY STRONG.

Mason Valley Jumps Up Twenty Points-Other Securities Slow.

Points—Other Securities Slow.

While Mason Valley has been silently working away and getting good results, the stock market has not been impressed with this property until the last few days. This morning the market took on a little spurt of activity in this stock and it jumped from \$2.47½ to \$2.67½. The highest price reached during the regular board session today was \$2.75. During the trading 2.65 shares changed hands at \$2.70. During the open and regular board sessions 4.47 shares of stock changed hands at advanced prices.

East Timite Gold King changed hands at a higher price today than it has ever sold on the market, and 25.000 shares sold at 7 cents.

shares sold at 7 couts.

Inon Blossom showed an inclination to go down and said as low at \$2.70 on the regular board and \$2.67% on the open board. Eack Tunnel showed some ac-

LEAD PRODUCERS

Declares Mining is Slow in Big Lead District of Gem State on Account of Conditions.

Close to a score of the operators of he lead producing mines of Idaho, colorado, Utah. and other western states met at 2 o'clock this afternoon at the Commercial club to discuss the lead situation and to take any action that may be deemed necessary to keep the present tariff on the product, and build up the industry. The men who are attending the convetnion began to arrive yesterday. Among the first to come was J. F. Calibreath of Denver, recretary of the American Mining congress. He registered at the Knutsford hotel, and in a short time was in touch with many of the members of the Utah Mine Operators' association, which has been collecting statistics on lead

Although not a large delegation so far as numebrs are concerned, but which ranks high when it comes to representing producing mines, was the party that arrived this morning from Idaho under the leadership of Harry L. Day of Wallace. He comes in the interests of the American Mining congress and also, as a representative of the Hercules property. With Mr. Day are such men as W. Clayton Miller of Spokane, representing the Federal Alines, J. F. McCarthy of Spokane, representing the Hecla properties; Judge M. A. Folsom of Spokane, representing the Bunker Hill and Sullivan companies and C. Fred Kratzer of Wallace, representing the National and the Caledonia mines. Although not a large delegation s

NOT CROWDING PRODUCTION.

"We are not crowding the produc-tion of the mines in idaho with the present weak conditions of the mar-ket," said Mr. Day this morning. "Of course there is a lot of work that must go ahead in spite of conditions, but at present the mines of our section are doing but little in development work ind are not pushing the mine pro-fuction.

and are not pushing the mine production.

"In Shoshone county about 85 per cent of the mining of the state is done. Conditions here speak pretty well of the entire state. The present weak market and the unsettled conditions over the tariff bave not improved things. As soon as these have righted themselves, as I believe they will within a short time, there will be a greater production from this section of the country than ever before."

The meeting today promises to produce a closer association of the mining interests of the western states than ever before. One thing that is certain and that is that a closer general idea of the cost of production will be gleaned than ever before.

ADDS TO ORE RESERVE.

Ray Consolidated Finds That it Has Two Million More Tons in Sight.

Two Million More Tons in Sight.

D. C. Jackling, general manager of the Ray Consolidated property at Kelvin, Arizona, leaves in a few days to look over the work that is now being done on this great copper property. He expects to be gone about 15 days and during that time he will look more thoroughly into the rapid developments being made on that property.

At present the drill holes are being connected up so that a definite estimate can be made of the glant bed of ore that underlies the property. According to a report received by Mr. Jackling, the company has added in excess of 2,000,000 tons of ore to its reserve, during the past month.

BINGHAM MINES SHIPPING.

The Bingham Mines company, which recently took over the property of the Bingham Consolidated company, which was formerly controlled by F. Augustus Heinze, has commenced shipping from its property at Lark. During the visit of President James P. Graves, arrangements were made for the opening of this property at once. Under the direction of Supt. John Creighton it has been put into shape and the mine is now turning out about 60 tous of ore a day. The Bingham Mines company, which

The ore being produced at this property runs 2% per cent copper, 23 per cent lead and about 12 ounces in silver The leasers on the property are making even a better showing than this, as they are sorting their ore.

opening up the company's property at Tintic, known as Eagle & Blue Bell. What will be done with the company's smelter at Bingham Junction is still an

The Mason Valley mine at Yerington has encountered the rich sulphide flesure in the lower tunnel, which on the level above was opened for 600 feet along the strike. The ore is from 30 to 40 feet wide, is a straight smelting product and assays 10 per cent copper.

Senator Dixon of Montana has filed Senator Dixon of Montana has filed with the schate committee on finance a statement in reference to the production of antimony in the United States and asking that it be protected. He asks that a tariff be placed on the importation of the cheap antimony ores that are now imported from Asia, Turkey, Germany and Mexico.

In removing a chunk of solid ore in a stope off the 460 level below the tunnel of the Columbus Consolidated company's property at Alta, a hole two feet wide was made through which a tream of dry, black, sandlike, sulphide ore began to run. Before this was stopped by the stope filling up to the level of the hole, Manager Tony Jacobson declares that about 200 tons of ore ran out. This can be handled with m shovel. This ore assays 10 per cent. cobson declares that about 200 tons of ore ran out. This can be handled with a shovel. This ore assays 10 per cent cepper and 15 ounces in silver. Ou the 400 foot level below the tunnel, the ere fissure has been traversed for 80 feet, and the contact has been reached. This contact has not been determined, but it is believed that it is the greatest and richest ever found in an Alta mine.

MARKET HIGHER, **CLOSING STRONG**

New York, March 22.-Initial prices f stocks showed some good gains today over Saturday's level in the active speculative issues and the whole list was moderately higher. The amount of business done, however, was small, Inion Pacific rose 1%, People's Gas, 1%, iteading, Great Northern, pfd., Canadian Pacific and American Smelting I, and Northern Pacific, Brooklyn Trünsit and Amalgamated ¾. Buying orders incerused largely and there was a further sharp advance in which the important railroads showed the largest share. The market quieted down considerably after many material gains had been made. Buying order for London account was a factor in the activity and strength of the first hour. When these orders had been executed the market became extremely dull and again and prices sagged a fraction. Bonds were steady.

Heavy buying of Reading enlivened things up a bit for a time, but the market soon returned to its pathetic state, when Reading stopped advancing. The rise carried Reading up 2%. Canadian Pacific 1½ and American Sugar 1.

The undertone of the market remained strong, and there was a further advance in selective stocks. Union Pacific 1½, and Atchison, Rio Grande and Great Northern Ore certificates 1.

The market closed strong and quite active. The copper and lead industrials led a late advance, in which American Smelting and Reading rose 34, Chicago & Alton 2%, Amalgamated Copper 2%. Northwestern 2, New York Central 1¾ and National Lead and Tennsssee Copper 1¼. dian Pacific and American Smelting 1,

Tennassee Copper 1%.
